

Semistereo releases new record: Trans Earth Injection

Trans Earth Injection is the band's third full length album. It is released through FREIA Music and contains 7 epic songs. The self produced album is recorded on various locations around the globe by among others Marcel van de Vondervoort (Astrosoniq, Roadburn Festival). The album is mixed and mastered by Jochem Jacobs (Textures, Face Tomorrow). Those two ingredients combined with the powerful songs from Semistereo have made it a mindblowing record.

Semistereo serves its Alternative rock with a pinch of both Postrock and Progrock. At times, Trans Earth Injection is erratic and unpredictable. In the media Semistereo is compared to Oceansize, Karnivool, Deftones and A Perfect Circle.

Even more than on previous releases, the band combines strong melodies with atmospheric depth and raw eruptions. The songs on the album support and showcase the strong and skillful vocals of Paul Glandorf. The production and overall sound are better than ever.

With their current, experienced line-up, Semistereo is ready for the future. The musicians played in bands like A Day's Work, Heidevolk, Mondvolland and Tree Funk Concept and were support acts for bands like Marillion, Red Hot Chili Peppers, Living Colour, Riverside and many other bands. Live, Semistereo grabs you by the throat, not letting go until the final chord has faded. Consider yourself warned!

Some Quotes:

“a perfect combination of post- and progressive rock” (3voor12)

“Weyburg – together with his partner in crime Frank Weijers– is playing the most magnificent and juicy guitar parts”(Lords Of Metal)

“This is a piece of major league progressive rock, finger-licking good. 4,5 / 5” (Festivalinfo.nl)

“The high, fragile vocals, the big layers of guitars that support it, the purely functional percussion, the dreamy atmosphere that still rocks... Brilliant!” (Rockportaal)

Semistereo is:

Paul Glandorf
Martijn Weyburg
Frank Weijers
Mickeal Schuurman
Marcel van de Graaf

Vocals
Guitar and vocals
Guitar
Bass
Drums
